

MailStore Cloud

Email Archiving in the Cloud

With MailStore® Cloud, Germany's specialist in email archiving is offering small and mid-sized companies a cloud-native email archiving solution in well-known MailStore technology and quality that is compatible with almost any email system.

Quick and easy to implement as well as flexible in terms of scalability, the archiving solution lets you archive all your emails and define policies to set the length of time you want to retain them for. In doing so, you'll be going a long way to complying with the retention laws applicable to business-critical email data and with data privacy legislation. In addition, legal hold, auditor access and eDiscovery functions are a great support in cases of litigation and other legal proceedings, while a self-service function allows employees to access their mail archives independently. A full-text search function coupled with a folder structure mapped from the user's email client help to simplify work carried out in the archive.

Available Immediately and at Any Time

Setting up the archiving solution is a quick and intuitive process. MailStore Cloud is available on your system within minutes of purchase.

Help With Legal Compliance

When used appropriately, MailStore Cloud helps you to comply with laws on retaining business-critical data, and certain provisions of the EU's GDPR.

Maximum Scalability & Flexibility

User licenses and storage capacity are booked via a web portal, invoiced on a monthly basis, and can be extended or reduced with immediate effect.

No Hardware Costs

The archiving solution is hosted and operated by OpenText in a highly available, ISO-certified data center in Germany equipped with a disaster recovery facility.

No Maintenance Costs

OpenText is responsible for maintaining the software and hardware. OpenText takes care of the solution's availability in accordance with the SLA.
